

# Square tubes

## Vierkantrohre

# COSMOS

ALUMINIUM

## standard

### 09

#### Notes:

\* The weight of each profile is calculated by measuring its cross-sectional area and multiplying it by the material density. The aluminium density is considered to be 2,70

\*\* Alloy and Length is subject to customer's request.

\*\*\* Radii less than 1mm are not stated.

#### \* Additional charge

**A** = Width

**A** = Height

**t** = Thickness

| Profile Code | A (mm) | t (mm) |  |  | Area<br>Fläche<br>(mm <sup>2</sup> ) | Weight<br>Gewicht<br>(Kg/m) |
|--------------|--------|--------|--|--|--------------------------------------|-----------------------------|
| 09-0054      | 10     | 1,5    |  |  | 51                                   | 0,14                        |
